

The screenshot shows a web interface titled "Fix-Up Task list". At the top, it indicates "20 items found, displaying 1 to 4" with pagination links: "[First/Prev] 1, 2, 3, 4 [Next/Last]". Below this is a table with the following columns: "Edit", "Display", "Ticker", "Publication moment", and "Description". The table contains four rows of data:

Edit	Display	Ticker	Publication moment	Description
<a href="#">Edit</a>	<a href="#">Display</a>	121212-A1S2D3	2018/10/10 10:54	Description number 1 ...
<a href="#">Edit</a>	<a href="#">Display</a>	121212-A1S2D4	2018/10/11 10:54	Description number 2 ...
<a href="#">Edit</a>	<a href="#">Display</a>	121212-A1S2D5	2018/10/12 10:54	Description number 3 ...
<a href="#">Edit</a>	<a href="#">Display</a>	121212-A1S2D6	2018/10/13 10:54	Description number 4 ...

Below the table, there are two buttons: "Create Fix-Up Task" and "Back to finder". The "Create Fix-Up Task" button is annotated with the URL "fixUpTask/customer/create.do". The "Back to finder" button is annotated with the URL "finder/handyWorker/edit.do". A note explains that the "Create Fix-Up Task" link is only visible for customers, and the "Back to finder" button is only visible for handy workers. Another note states that edit links are only visible for customers and only when the fix-up task doesn't have any application associated.
